NeoWell — Manual Test Checklist

App v2 (mobile) · Backend v2 · 67 checks

NeoWell
Track. Care. Thrive.

Tester name: _____ Date: _____

Device and OS (e.g. Tecno Spark 10, Android 13): _____ Role tested (parent / doctor / both): _____

Before you start

- The test coordinator runs the backend with the demo doctor seeded (SEED_DEMO_CLINICIAN_PHONE) and JOBS_ENABLED=true, and points the app at it (EXPO_PUBLIC_API_URL).
- Sign-in codes are not sent by SMS yet: ask the coordinator for your 6-digit code (it is printed in the backend log).
- Payments are a sandbox: they confirm by themselves after about 3 seconds. A payer number ending in 000 makes the payment fail on purpose.
- Use two phones or two browser windows: one as a parent, one as the demo doctor.
- For each item, mark Pass, Fail or Not tested. For every Fail, write what you did, what you expected and what you saw.

1. Sign-in and onboarding

#	Check	Pass	Fail	N/T	Notes
1	Language switch (English / Français) on the sign-in screen changes the text	☐	☐	☐	
2	An invalid phone number shows an error; 6 70 00 00 00 is accepted	☐	☐	☐	
3	A wrong code shows an error; 'Send a new code' and 'Change number' work	☐	☐	☐	
4	Profile: first and last name are required; after typing the last name, a note says the baby will be called 'Baby {last name}'	☐	☐	☐	
5	Consent: cannot continue until the first box is ticked; the disclaimer is shown	☐	☐	☐	
6	After closing and reopening the app, you are still signed in	☐	☐	☐	

2. Home (parent)

#	Check	Pass	Fail	N/T	Notes
7	Greeting with your first name, bell with unread dot, tabs Home / Doctors / Inbox / Me	☐	☐	☐	
8	Empty state 'Add your baby...' when there is no baby	☐	☐	☐	
9	Baby card shows name, age (plus corrected age if preterm) and 'Needs extra care' when relevant	☐	☐	☐	
10	Baby card shows the last result badge, checks due today, Start check and Baby is unwell	☐	☐	☐	
11	Tip of the day and 'Nearest health facilities' are shown	☐	☐	☐	

3. Add / edit a baby

#	Check	Pass	Fail	N/T	Notes
12	Step 1: sex, date of birth (a future date is rejected), optional name with the 6-week naming note	☐	☐	☐	
13	Step 2: weeks of pregnancy, weight, length and head circumference are required; out-of-range values are rejected; 45,5 (comma) is accepted	☐	☐	☐	
14	Step 3: birth facility can be searched or typed; 'Where is the baby now?' offers home / hospital / kangaroo care	☐	☐	☐	
15	A baby born before 37 weeks or under 2.5 kg shows risk factors and 'Needs extra care'	☐	☐	☐	
16	In hospital or kangaroo care: home checks are paused; 'My baby is home now' resumes them	☐	☐	☐	
17	Edit saves changes; Remove asks for confirmation	☐	☐	☐	
18	A baby born 42+ days ago without a name shows 'add your baby's name'; once a name is added it replaces 'Baby X' ('Bébé X' in French)	☐	☐	☐	

4. Baby overview, growth and history

#	Check	Pass	Fail	N/T	Notes
19	Overview shows Today (checks per day and times), Growth, Recent checks, Medicines and Consultations	☐	☐	☐	
20	Growth shows weight, length and head size with WHO pills (usual range / outside / far outside)	☐	☐	☐	
21	Preterm babies show 'Compared using corrected age'	☐	☐	☐	
22	Update measurements: values are pre-filled, at least one must change, and the new entry appears in the list	☐	☐	☐	
23	History lists every check with date, temperature, result badge, findings, check type and photo	☐	☐	☐	

5. Daily check

#	Check	Pass	Fail	N/T	Notes
24	Temperature comes first with big +/- buttons; values outside 30–43 °C are rejected	☐	☐	☐	
25	Room and clothing questions appear only when the temperature is high or low	☐	☐	☐	
26	Feeds counter works; the breath counter opens a 60-second tap screen	☐	☐	☐	
27	Danger answers turn red when chosen; a photo can be added	☐	☐	☐	
28	Normal answers give a green 'All looks well' result	☐	☐	☐	

6. 'Baby is unwell' check

#	Check	Pass	Fail	N/T	Notes
29	Complaint grid allows several choices; free-text box; voice note up to 60 s (phone only)	☐	☐	☐	
30	Follow-up questions match the complaints chosen	☐	☐	☐	

#	Check	Pass	Fail	N/T	Notes
31	Fever 38–38.9 °C in a baby over 3 months: yellow result with cooling steps and a 30-minute re-check card	☐	☐	☐	
32	After a re-check is due, Home shows a 'Re-check now' banner	☐	☐	☐	
33	Fever in a baby under 3 months, or any danger sign: red 'Seek care now', no-medicines warning, emergency call buttons	☐	☐	☐	
34	Red/yellow results offer 'Find the nearest facility' and 'Talk to a doctor'	☐	☐	☐	
35	Choosing twitching / fits shows the explanation of what fits look like	☐	☐	☐	

7. Offline

#	Check	Pass	Fail	N/T	Notes
36	With no internet, finishing a check shows 'saved, will send automatically' and Home shows 'waiting to send'	☐	☐	☐	
37	An offline check with a danger sign still shows 'Seek care now'	☐	☐	☐	
38	Back online, the check is sent by itself and is not duplicated	☐	☐	☐	

8. Nearest facilities

#	Check	Pass	Fail	N/T	Notes
39	Location permission is asked; facilities are listed by distance with services	☐	☐	☐	
40	Each department has a call button that opens the phone dialler	☐	☐	☐	

9. Doctors, booking and payment

#	Check	Pass	Fail	N/T	Notes
41	Doctors tab shows your active consultations, the privacy note and filters (All / Available now / Chat / Voice / Video)	☐	☐	☐	
42	Doctor card and profile show photo, verified tick, rating, fees per medium and weekly hours	☐	☐	☐	
43	Booking: choose baby, medium (with price), ASAP or a time slot, and a reason	☐	☐	☐	
44	After a fever result and 'Talk to a doctor', the 'Before you book, have you...' checklist appears	☐	☐	☐	
45	Paying with MTN or Orange shows 'Approve the payment on your phone...', then opens the consultation	☐	☐	☐	
46	A payer number ending in 000 fails and lets you retry	☐	☐	☐	

10. Consultation (parent)

#	Check	Pass	Fail	N/T	Notes
47	Status and banner change: waiting for the doctor → confirmed → in progress → completed	☐	☐	☐	
48	Chat is closed until the doctor accepts; then text and photos send and arrive within about 5 seconds	☐	☐	☐	
49	A phone number typed in a message is hidden	☐	☐	☐	

#	Check	Pass	Fail	N/T	Notes
50	Voice/video consultations show 'Join the call' (opens in the browser; needs call settings on the backend)	☐	☐	☐	
51	Referral card shows facility, urgency, code and call buttons; Medicines card links to the medicines screen	☐	☐	☐	
52	Cancel explains the refund rule; a completed consultation can be rated once with 1–5 hearts	☐	☐	☐	

11. Medicines

#	Check	Pass	Fail	N/T	Notes
53	Each medicine shows dose, route, times and instructions, with Given / Skip per dose time	☐	☐	☐	
54	Dose alarms and check reminders appear as phone notifications (not on the web version)	☐	☐	☐	

12. Inbox and Me (parent)

#	Check	Pass	Fail	N/T	Notes
55	Inbox lists notifications (confirmed, new message, referral, medicines); unread are highlighted	☐	☐	☐	
56	Tapping a notification opens the right screen; 'Mark all as read' works	☐	☐	☐	
57	Me: name and phone, language switch (whole app changes language), consent toggles	☐	☐	☐	
58	Export my data works; Delete my account explains the 30 days and asks for confirmation; Sign out works	☐	☐	☐	

13. Doctor (sign in with 'I am a doctor')

#	Check	Pass	Fail	N/T	Notes
59	New doctor: setup form with fees per medium and payout number is required before anything else	☐	☐	☐	
60	Verification: upload photo, licence, degree and proof of employment; status becomes 'We are checking your documents'	☐	☐	☐	
61	Demo doctor: 'Available now' switch (Off / 1 h / 2 h / 4 h)	☐	☐	☐	
62	New requests show 'Answer before ...' with Accept / Decline; Today & upcoming and Past sections are filled	☐	☐	☐	
63	Consultation room: patient summary (risk factors, growth, 7-day checks, temperature range) and the mother's checklist	☐	☐	☐	
64	Chat, Start, Complete (assessment and notes), 'Mother did not come' and Cancel work	☐	☐	☐	
65	Prescribe (medicines, time chips, days) and Refer (facility, urgency, reason) appear on the parent's side	☐	☐	☐	
66	Earnings show to be paid, paid, completed count and payouts	☐	☐	☐	
67	Me: 'How mothers see you' preview, edit profile, weekly availability (invalid hours rejected), verification, language, sign out	☐	☐	☐	

Not testable yet: real SMS, real mobile money, push notifications from the server (needs an EAS project id), voice-note transcription (needs the speech-to-text server), and the disease knowledge base (waiting for the product owner's spreadsheet).
